WOOD-FIRED PIZZA WATERING HOLE

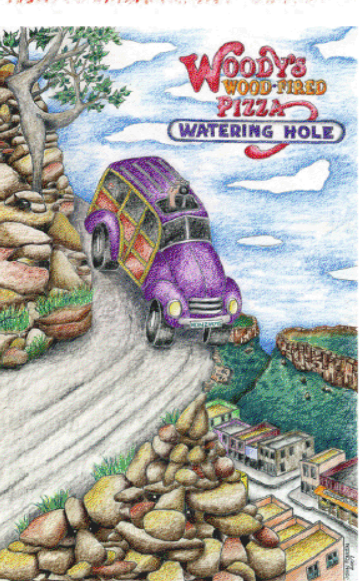

When the original building structure was built in 1915, some of the first gasoline pumps in the area were installed to service a fleet of Stanley Steamers. These vehicles were the original hybrid automobiles combining steam and gasoline for power. Given this chronology, Woody's is said to be housed by one of the oldest standing service station buildings in the West! Today, we still like to consider ourselves something of a "service station" for our guests. We provide excellent customer service and an unbeatable value. For our community, we are committed to operating a sustainable business. On Earth Day 2010, Woody's received the City's Sustainable Business Award for our efforts to reduce Paper, Plastic, and Profit... through Pura. To raise your glass to good times, good friends, and great pizza!

From the family you've, welcome to the Original Woody's, The Rustles Family

THE ORIGINAL GOLDEN, CO USA

TAKE N' BAKE INSTRUCTIONS

1. Preheat your oven to 500°
 2. Place pizza in the middle rack on your cooking tray or a pizza stone.
 3. Cook pizza for about 8 minutes or until crust is golden brown.
- For best results cook ASAP. Because all ovens are different, cooking times and temperatures may vary.
